Pet Cremation

MINIPAWS CHAMBER™

The Addfield MiniPaws Chamber™ provides additional chambers to the Addfield A50 IC pet cremation range, you can expand the capacity of your machine as and when you need, improving productivity.

Designed to enable up to 5 extra small pets a day, from guinea pigs to a household cat. The chambers can be operated at the same time as your primary chamber, or on it's own, depending on your load for the day minimising fuel usage. You can add one chamber onto the A50 IC 1, and up to two chambers on the larger A50 IC units.

The MiniPaws Chamber™ is an add-on, not a complete machine.

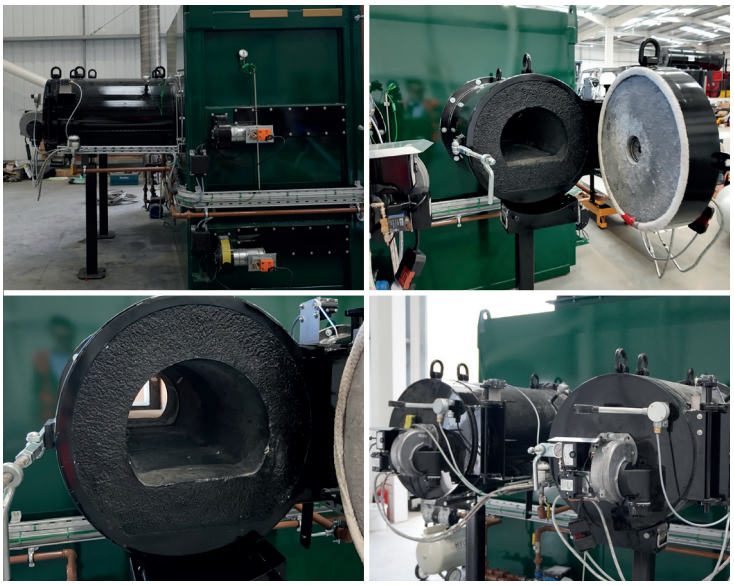
The Addfield Difference

- Pre-Fabricated thick, robust mild steel.
- The chamber is lined with a cast conrete refractory hand built by our expert engineers in the UK.
- Compact thermocouple burnout sensors to measure and track the temperature in the chamber.
- Premium paint finish - Steel structures are painted using a two-pack high grade paint system.
- Can be operated at the same time as your primary chamber on the A50 IC machines, or individually without impacting the performance.
- Dedicated burner to ensure full, efficient combustion.
- Equipped with unique ash tray for optimal ash removal after cremation.

MiniPaws Chamber™ Specification	
Inside Chamber Length (mm)	675
Inside Chamber Width (mm)	225
Chamber Volume m^3	0.03
External Chamber Diameter (mm)	700
External Chamber Length incl. Burner (mm)	1270
Weight (kg)	440

Ideal for

Cats Rabbits Rodents Birds



Addfield MiniPaws Chamber™ Options

Single Unit

Ideal to add onto the Addfield A50 IC 1, the single unit MiniPaws Chamber™ increases the amount of small pets you can do in a day up to 5.

Double Unit

The double unit can be installed on the Addfield A50 IC 2 up to the A50 IC 4, and maximises the throughput of small pets by up to 10.
